IN THE CLAIMS

Please cancel claims 1-12 without prejudice or disclaimer.

Please amend claims 17 and 30 as follows. A marked-up copy of the claims, showing the changes made hereto, is attached.

17. (Twice Amended) A laser oscillating apparatus comprising:

a gas supply path structure of a convergent-divergent nozzle type,

including a fluid inlet into which a laser gas is made to flow, a throat portion for controlling a flow speed of said laser gas less than a speed of sound, and a fluid outlet of which said laser gas from said throat portion is made to flow out; and

a waveguide unit for guiding microwave into said gas supply path structure,

wherein the laser oscillating apparatus is an excimer laser oscillating apparatus.

30. (Twice Amended) A laser oscillating apparatus comprising: a gas supply structure group including a plurality of connected convergent-divergent nozzles, said nozzle each comprising a fluid inlet into which a laser gas is made to flow, a throat portion for controlling a flow speed of said laser gas, and a fluid outlet of which said laser gas from said throat portion is made to flow out; and

a waveguide unit for guiding microwave into said gas supply path structure group,
